PEHU XY

positioning system

PEHU
length measuring systems

The PEHU XY coordinate punch-drill positioning table with a very easy operate CNC controller which can be fitted on a single end punch with a 250 mm / 10" or larger throat depth.

The **PEHU XY** can be installed on new or existing punch, drill machines.

Utilizing a Microsoft Windows PC based controller, it's very easy to operate, (input X and Y coordinate in a table excel sheet).

Especially advantageous is the repeatability accuracy ensured by the ball screw assemblies and incremental encoder. The use of labor intensive manual layout is no longer required.

- X travel 1500mm/40" – Y travel 500 mm / 16" (basic)
- Repeatability: +/- 0.1 mm
- Easy to operate
- No CNC training required
- Fits on any punch machine
- Works 10 time faster than manual

Options

- Extended X-travel per meter
- Extended Y-travel per 100 mm
- Interconnection kit
- Extended plate
- Graphic simulation
- DSTV NC pack, reading and writing to USB + Graphic simulation
- Controller in arm **1**
