## Roller Track Systems

The Selmach stand alone gravity roller track systems are adjustable for height and available in 350mm, 450mm, 620mm and new 750mm widths. These heavy-duty, modular systems provide an excellent material handling solution for virtually all bandsaws, steelworkers and pillar drills.

Speak to us about bespoke roller track systems too, if you need a specialist solution.

We can also offer bespoke motorised systems and vertical rollers too.

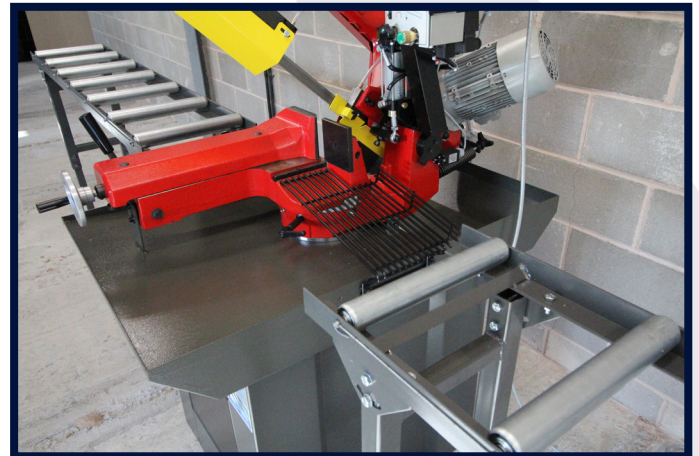

For our larger, CNC Sterling saws, we can also include powered roller track solutions for fully automatic material processing solutions.

## Machine Features

- Heavy duty machined bearings
- Fully adjustable modular system
- Large selection of load capacities
- Available in 4 different widths
- Adjustable Height (610mm - 960mm)

## Optional Equipment

- Bespoke track sizes
- Vertical rollers
- Motorised systems

## TECHNICAL SPECIFICATIONS

STOCK CODE	Width	Length	Roller Ø	Height	No. of Rollers	Max. Capacity (Uniform Distributed Load - UDL)	Frame Size RSA
	mm	mm	mm	mm		kg	mm
