

Bauer have been designing and manufacturing bandsaws in Germany since 1937, with thousands of machines installed worldwide. Bauer products have firmly established a reputation for long life and reliability with many machines still in use today in the UK after many years of service.

The entry level S280G is surprisingly competitive, yet still has the benefit of a mitring head for angle cutting. The S280DG offers double mitring and increased beam capacity. The S320DG machines are large capacity double mitre bandsaws available in manual and semi automatic operation.
